ABOUT US

JSC Beer & Soft Drinks Plant «KRYM» is the largest manufacturer of beer, soft drinks, mineral and drinking waters in Crimea. The plant is located in the heart of the Crimean Peninsula – the city of Simferopol. The plant was built and put into operation under the guidance of the best European specialists in 1982. High quality, traditional technologies and natural components make our products beloved and popular more than 40 years. The plant «KRYM» is the financially stable enterprise with the highly professional specialists. All the products are manufactured according to original formula.

The enterprise has implemented the HACCP system (GOST R 51705.1-2001 «Quality system. HACCP principles for food products quality management»), which allows to provide control over the safety of the products manufactured. JSC «BSP «KRYM» is equipped with the most modern equipment;

The enterprise is producing classic pale and dark lagers, premium beer brands. Beer making is a complex and lengthy process consisting of several technological stages: making of malt, making of beer wort, fermentation, maturation, beer filtration and bottling. The beer produced by the plant «Krym» is made from natural high-quality raw materials and according to special technology, which includes advanced scientific achievements and classical traditions of brewing.

We provide control of the products manufactured at every technological stage at our own laboratory, thus guaranteeing high quality and original taste.

ABOUT US

Non-alcoholic sparkling drinks line includes:

- retro-series: «Lemonade», «Citro Extra», «Duchess», «Cream Soda», «Tarkhun», «Gazirovka»;
- youth series: «Krymchik»;
- cocktail line: «Mojito», «Krym-Cola» and «Krym Tonic»;
- energy drink: «Krym Energy»;

The enterprise is manufacturing drinking water, flavored water and special mineral therapeutic-table water «Krymskaya», which is extracted from the well – an artesian spring 900 meters deep in the resort town of Saki. “Krymskaya» was one of the four main mineral waters in the former USSR: «Krymskaya», «Narzan», «Borzhomi» and «Essentuki». Mineral water «Krymskaya» is included in the register of state registration certificates of Russia and is produced in accordance with GOST R 54316-2011. During summer time the enterprise produces kvass «Krymsky».

ABOUT US

Our products are presented all over the Russian Federation and exported abroad.

The convenient location of the plant allows shipments by land as well as by sea. Various types of shipments can be combined, if required.

BENEFITS OF BREWING BY CLASSIC TECHNOLOGY

There are two basic technologies for brewing:

- ✓ - classic technology, when hop is loaded at the brewing phase.
- ✓ - fast technology, when hop products, or hop extracts are added at the filtration phase.

The classic technology of brewing was developed and put into operation in «KRYM» according to a Czech project, and it has not been changed since the plant foundation in 1982.

- ✓ JSC «KRYM» uses only natural high-quality hop from Europe as well as thoroughly selected malt.

- ✓ Beer wort brewing process takes up to 8 hours.

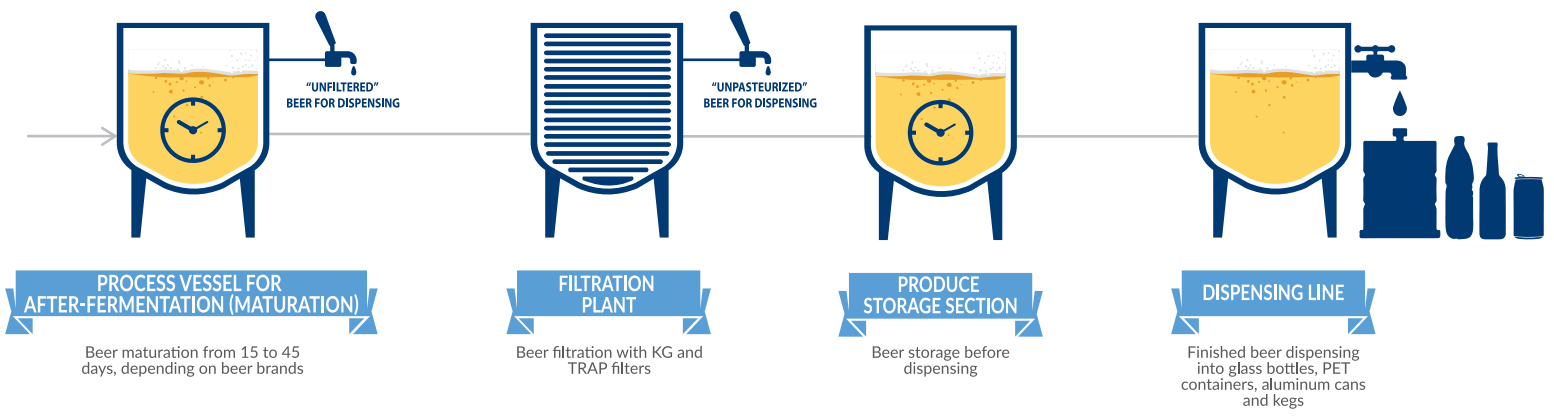

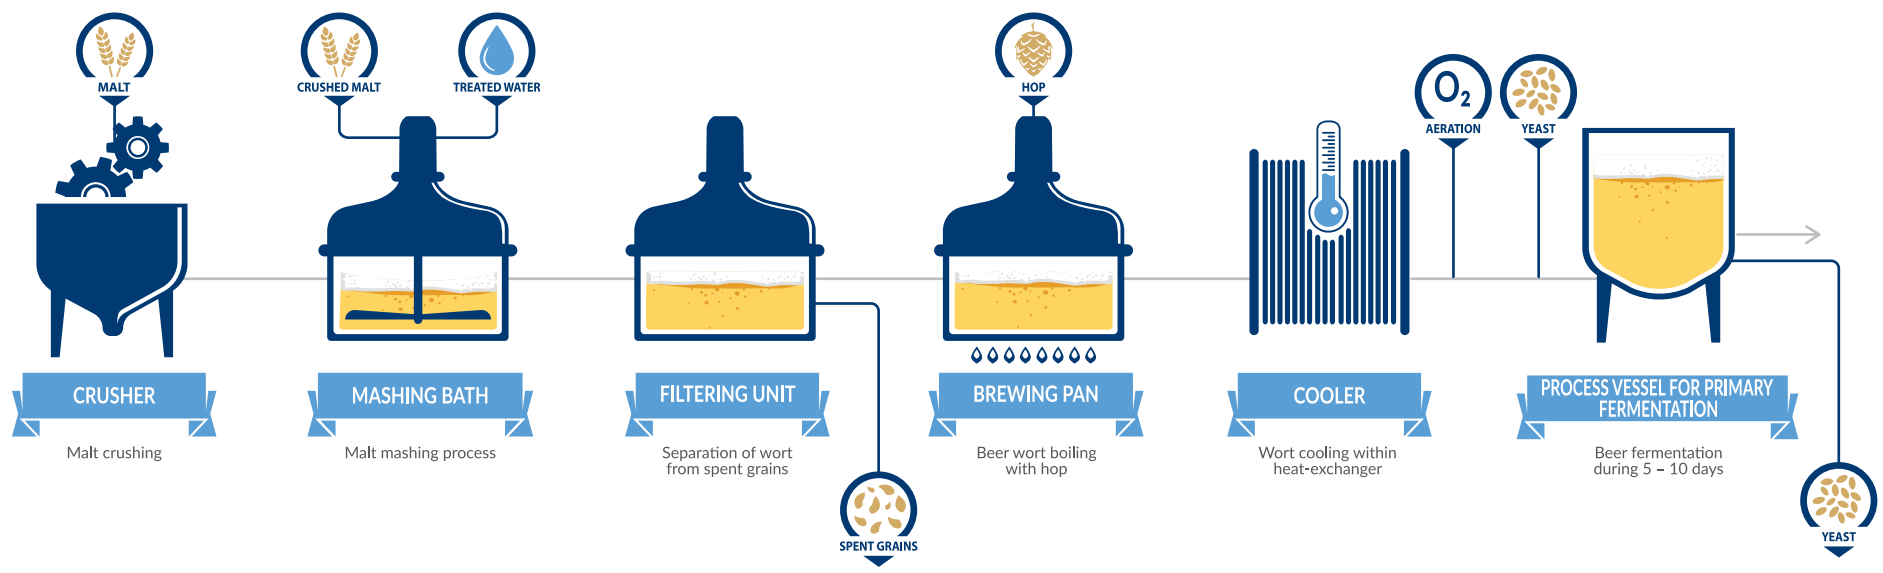

- ✓ Beer fermentation process lasts from 5 to 10 days.

- ✓ After fermentation process, beer is fed into process vessels for after-fermentation, where young beer matures for 15-45 days and develops an aromatic flavor as well as the brand features of genuine mature beer.

- ✓ All the equipment conforms to the highest quality standards and includes the most advanced automation system.

BREWING BY CLASSIC TECHNOLOGY

KRYM NON-ALCOHOLIC

«KRYM NON-ALCOHOLIC» is an alcohol-free drink from the premium line of our products. It has no alcohol and is notable for its gentle hop flavor, clear golden color, softness and perfect refreshing effect.

BEER

WHITE ROCK

«WHITE ROCK» is a premium light unfiltered beer, which has a pronounced wheat flavor and a delicate spicy aroma. Presence of unfiltered yeast changes its color to a straw-golden, opaque shade. This beer has several distinctive features: coriander grains are used to give a spicy flavor, and select varieties of wheat malt for the rich taste of white beer. Combination of these and other high-quality components in the «WHITE ROCK» beer gives it a unique palette of taste and aroma.

Unfiltered yeast contributes to the formation of a sediment, which is recommended to be shaken before drinking the «WHITE ROCK» beer – so you can feel the full taste of premium unfiltered beer. «WHITE ROCK» is referred to beer beverages in accordance with the requirements of GOST because of the presence of natural coriander.

PRODUCT COMPOSITION

Drinking water, light barley malt, wheat malt, coriander, hop, yeast.

BEER

BLACK MOUNTAIN

«BLACK MOUNTAIN» is a premium dark unfiltered beer with a pleasant burnt malt taste with pronounced hop bitterness and spicy aroma. Under the rays of the sun, this beer acquires shades of maroon, velvet, opaque color. The uniqueness of this beer is that for its making we use 3 types of malt: brewing barley light, brewing barley dark, wheat malt. The final note of taste in the «BLACK MOUNTAIN» beer is coriander grains, they give the beer a rich spicy aroma.

Like any quality unfiltered beer, «BLACK MOUNTAIN» eventually forms a sediment, which is desirable to dissolve by shaking before consumption– so the taste of beer will be more saturated. Used select varieties of the best malt and bittering hops create an exquisite taste, which will be appreciated by lovers of dark beer. «BLACK MOUNTAIN» is referred to beer beverages in accordance with the requirements of GOST because of the presence of coriander and natural caramel color.

PRODUCT COMPOSITION

Drinking water, light barley malt, dark coloured malted barley, wheat malt, coriander, hop, sugar color, yeast.
