TRADITIONS OF QUALITY

## ABOUT US

JSC «Beer and soft drinks plant «KRYM» is the biggest manufacturer of beer, soft drinks, mineral and drinking waters in Crimea – one of the most beautiful resort region of the Russian Federation. It is situated in the heart of the Crimean Peninsula – the city of Simferopol.

The plant was built and put into operation under the guidance of the best European specialists in 1982. The enterprise capacities permit to produce more than 15 million daL of beer and over 5 million daL of soft drinks, mineral and drinking waters per year.

Top quality manufacturing, classic technologies, natural ingredients and highly qualified specialists have been making our products popular and well-loved for already more than 35 years.

JSC «KRYM» uses the most advanced equipment. «KRYM» is financially stable enterprise. Big volumes of investments are made into the development of all business segments on the annual basis. In 2016 a new PET filling production line for beer and beverages was put into operation. In 2017 a new aluminum can filling production line was put into operation.

The total volume of investments in 2016 -2017 is about 8,000,000 USD.

The HACCP system (GOST R 51705.1-2001 «Quality System. Quality Management of food products based on HACCP principles») is implemented at the plant, which permits to ensure safety control high-end quality of products.

Our laboratory checks the quality of products at each phase of production, which guarantees the high-end quality and genuine flavor of all our products.

Classic technology brewing that we use to make our beer is a long and complex process the consists of several phases: malting, beer wort production, attenuation, maturation, beer filtration and its dispensing. Beer brewed by «KRYM» is produced from natural high-quality raw materials according to genuine recipes and special know-how, which includes advanced science achievements and classic brewing traditions.

Our the most popular beer brands are: CRIMEAN RIVIERA (premium lager), WHITE ROCK (premium unfiltered beer), BLACK MOUNTAIN (premium unfiltered dark beer), GOLDEN GRYPHON (premium dark beer), KRYM (classic lager).

## ABOUT US

The range of non-alcohol beverages is represented by: the old style drinks – LEMONADE, CITRO EXTRA, DUCHESSE, TARKHUN. Our the most popular soft drinks brands are: LEMONADE and MOJITO (sweet soft drinks), KRYMSKAYA (mineral water).

KRYMSKAYA mineral water is extracted from an artesian well more than 900 m deep in the pure ecological site – the resort city of Saki.

It is one of the four major mineral waters, which existed on the territory of the USSR: «Narzan», «Borjomi» and «Essentuki» and KRYMSKAYA. Now KRYMSKAYA mineral water is added into the Russian Register of State Registration Certificates, and its production conforms to GOST R 54316-2011. KRYMSKAYA mineral water is good for health and helps in prevention and treatment of many diseases.

Our drinking water is a normal table water with balanced content of microelements required for human health, beauty and excellent well-being. It is useful and ideally suitable for everyday usage.

## ABOUT US

## LOGISTICS

Our products are presented all over the Russian Federation and exported abroad.

The convenient location of the plant allows shipments by land as well as by sea. Various types of shipments can be combined, if required.

# BENEFITS OF BREWING BY CLASSIC TECHNOLOGY

There are two basic technologies for brewing:

- ✓ - classic technology, when hop is loaded at the brewing phase.
- ✓ - fast technology, when hop products, or hop extracts are added at the filtration phase.

The classic technology of brewing was developed and put into operation in «KRYM» according to a Czech project, and it has not been changed since the plant foundation in 1982.

- ✓ JSC «KRYM» uses only natural high-quality hop from Europe as well as thoroughly selected malt.
- ✓ Beer wort brewing process takes up to 16 hours.
- ✓ Beer fermentation process lasts from 7 to 10 days.
- ✓ After fermentation process, beer is fed into process vessels for after-fermentation, where young beer matures for 21-46 days and develops an aromatic flavor as well as the brand features of genuine mature beer.
- ✓ All the equipment conforms to the highest quality standards and includes the most advanced automation system.

*We are responsible for the quality of our beer!*

0,45 litres

# BEER

## CRIMEAN RIVIERA

«CRIMEAN RIVIERA» is a classic light premium-class lager with a soft, pleasant aroma of hops and malt, with a refined floral taste and light golden color.

The selected barley malt of the highest quality varieties is used for the production of this brand of beer. From the entire crop experts select only 10% of brewing barley, which is used to make the «CRIMEAN RIVIERA». An elite aromatic and bitter hops from one of the best producers in Europe gives the beer finished, unique firm taste.

«CRIMEAN RIVIERA» will be to the taste of connoisseurs of unchanging, classic brands of the premium beer.

### PRODUCT COMPOSITION

Prepared drinking water, malt brewing barley light, maize grits, hop.

Nutrition value: carbohydrates – 4,7 g/100 g of beer.

Energy value: 46 kcal/100 g of beer.

Initial wort density – 12,0%

Alcohol content – min. 5.0% by volume

Complies with GOST 31711-2012

# BEER

## WHITE ROCK

«WHITE ROCK» is a premium light unfiltered beer, which has a pronounced wheat flavor and a delicate spicy aroma. Presence of unfiltered yeast changes its color to a straw-golden, opaque shade. This beer has several distinctive features: coriander grains are used to give a spicy flavor, and select varieties of wheat malt for the rich taste of white beer. Combination of these and other high-quality components in the «WHITE ROCK» beer gives it a unique palette of taste and aroma.

Unfiltered yeast contributes to the formation of a sediment, which is recommended to be shaken before drinking the «WHITE ROCK» beer – so you can feel the full taste of premium unfiltered beer. «WHITE ROCK» is referred to beer beverages in accordance with the requirements of GOST because of the presence of natural coriander.

### PRODUCT COMPOSITION

Drinking water, light barley malt, wheat malt, coriander, hop, yeast.

Nutrition value: carbohydrates – 4,7 g/100 g of beer.

Energy value: 46 kcal/100 g of beer.

Initial wort density – 12,0%

Alcohol content – min. 5.0% by volume

Complies with GOST 55292-2012

Aluminum can  
0.45 litres

Glass bottle  
0.5 litres

PET keg /  
Aluminum keg  
30 and 50 liters

# BEER

## BLACK MOUNTAIN

«BLACK MOUNTAIN» is a premium dark unfiltered beer with a pleasant burnt malt taste with pronounced hop bitterness and spicy aroma. Under the rays of the sun, this beer acquires shades of maroon, velvet, opaque color. The uniqueness of this beer is that for its making we use 3 types of malt: brewing barley light, brewing barley dark, wheat malt. The final note of taste in the «BLACK MOUNTAIN» beer is coriander grains, they give the beer a rich spicy aroma.

Like any quality unfiltered beer, «BLACK MOUNTAIN» eventually forms a sediment, which is desirable to dissolve by shaking before consumption – so the taste of beer will be more saturated. Used select varieties of the best malt and bittering hops create an exquisite taste, which will be appreciated by lovers of dark beer. «BLACK MOUNTAIN» is referred to beer beverages in accordance with the requirements of GOST because of the presence of coriander and natural caramel color.

### PRODUCT COMPOSITION

Drinking water, light barley malt, dark coloured malted barley, wheat malt, coriander, hop, sugar color, yeast.

Nutrition value: carbohydrates – 5,7 g/100 g of beer.

Energy value: 48 kcal/100 g of beer.

# BENEFITS OF SOFT DRINKS PRODUCTION BY CLASSIC TECHNOLOGY

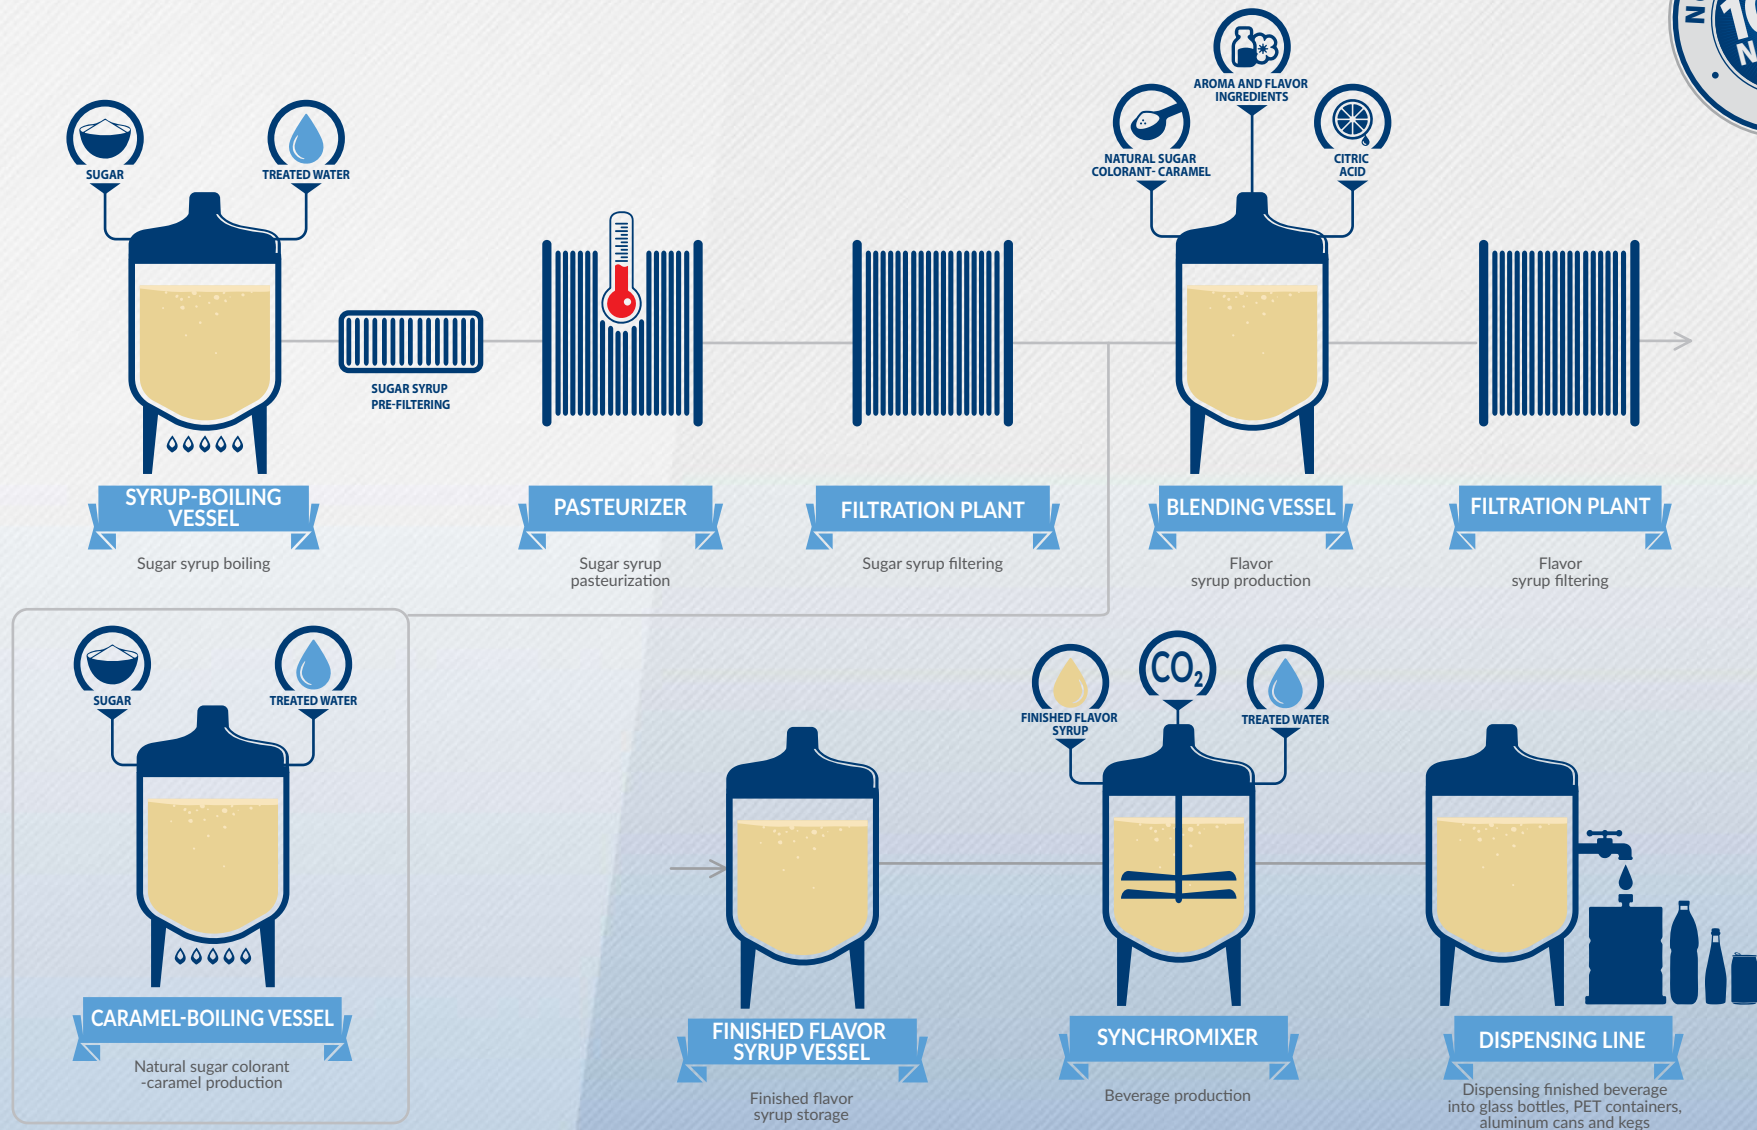

- ✓ We do not use sweeteners or glucose-fructose syrup for our soft drinks. We make the syrups and natural sugar colorant - caramel exclusively, on the basis of high-quality sugar.
- ✓ There are 4 types of sugar colorants: sugar colorant I, II, III, IV. From good type I to unhealthy type IV, the use of which should be reduced by 160-200 mg/kg of body weight. In our boiling vessels, we produce natural sugar colorant - I, in plain language, caramel. It is harmless, has excellent properties of natural colorant and gives the straw-golden color to the beverage.
- ✓ We make soft drinks, exclusively, on the basis of natural aroma and flavor ingredients.
- ✓ The soft drinks flavor depends also on water quality; in «KRYM» it passes through four filtration grades; it is purified and softened, becoming optimally balanced in its acid-base equilibrium indicator (pH).

*We are responsible for the quality of soft drinks!*

# SOFT DRINKS BY CLASSIC TECHNOLOGY

## LEMONADE

«LEMONADE» is a sweet soft drink having a cool property. JSC «BSP «KRYM» traditionally uses the natural caramel color (prepared by heating sugar) for making the Lemonade.

Caramel color is produced in our facility with observance of traditional technology. It gives the drink a straw-golden color and complements the taste of «LEMONADE». The purity of the drink taste is achieved through the use of purified and specially prepared water. JSC «BSP «KRYM» cleans and softens water, giving it an optimal balanced composition. Combination of water, caramel color, and flavor and aromatic compositions makes it possible to create a unique taste of the classic «LEMONADE», familiar to us from childhood!

### PRODUCT COMPOSITION

Prepared drinking water, sugar, acidity regulator - citric acid, preserving agent - sodium benzoate, "Lemonade" nature-identical flavoring agent, natural coloring agent - sugar dye.

Nutrition value: carbohydrates – 10,4 g/100 g of beer.

Energy value: 41,6 kcal/100 g of beer.

Complies with GOST 28188-2014

Aluminum can  
0.33 litres

Glass bottle  
0.5 litres

PET bottle  
0.5, 1 and 2 liter

PET keg /  
Aluminum keg  
30 and 50 liters

### RETRO SERIES OF BEVERAGES

## CREAM SODA

«CREAM SODA» is a strongly sparkling soft drink of pinkish-yellow color.

The drink is made according to the traditional sparkling drinks production technology preserved since the «Soviet» times.

«CREAM SODA» has a pleasant creamy taste with a delicate vanilla hint. The right combination of components gives the drink its famous fresh and unique taste and flavor.

### PRODUCT COMPOSITION

Treated drinking water, sugar, acidity regulator - citric acid, preserving agent - sodium benzoate, food flavoring agent - «Cream Soda», food flavoring agent - «Butter cream», natural coloring agent - sugar dye.

Nutrition value: carbohydrates - 10.0 g per 100 g.

Energy value: 40.0 kcal per 100 g.

Complies with GOST 28188-2014

PET bottle  
1 and 2 liter

RETRO SERIES OF  
BEVERAGES

## CITRO EXTRA

«CITRO EXTRA» is a refreshing fruity sparkling drink. In the classical version, it has a pronounced fruity aroma and a taste of a mixture of citrus fruits. Citrus base of the drink is a natural flavor-aroma composition of orange, mandarin and lemon with vanilla. In the rest – it's a classic drink, made using technology similar to the making of Lemonade, but with more pronounced sweetness.

Lemonade is also produced using natural caramel color, which is produced directly by the enterprise using the same technology.

### PRODUCT COMPOSITION

Prepared drinking water, sugar, acidity regulator - citric acid, "Extra Citro" flavoring agent, preserving agent - sodium benzoate, natural coloring agent - sugar dye.

Nutrition value: carbohydrates – 12,4 g/100 g of beer.

## TARKHUN

«TARKHUN» is a sweet, sparkling soft drink that has a familiar bright and memorable taste, as well as a characteristic emerald shade. It is based on the extract of estragon (herbaceous plant tarhun). This extract was added to Gazirovka water with natural syrups in the Caucasus long ago.

Since 1983, the recipe of the classic Tarhun has been transferred to the technologists of the JSC «BSP «KRYM» and since then has remained unchanged. Its basis is softened, purified water, natural flavor and aroma composition of a popular drink.

### PRODUCT COMPOSITION

Prepared drinking water, sugar, acidity regulator - citric acid, preserving agent - sodium benzoate, "Tarkhun" natural flavoring agent, Tarkhun-type herbal flavoring agent (aromatic extract, aromatic nature-identical substances, E102 coloring agent, E131 coloring agent).

Nutrition value: carbohydrates – 11,5 g/100 g of beer.

Energy value: 46,0 kcal/100 g of beer.

## MOJITO

Composition of the «MOJITO» drink includes mint and natural flavoring of lime Lime Tahiti. The mint we use grows in unique climatic conditions of the picturesque areas of the foothill Crimea, due to which it has distinctive refreshing properties and surprisingly mild taste and aroma.

Mint and lime have pronounced flavors, but they do not add bitterness and sour taste to the drink, which makes it one of the most popular in the summer for quenching thirst and feeling coolness.

Also, «MOJITO» is great for creating various cocktails.

### PRODUCT COMPOSITION

Prepared drinking water, sugar, acidity regulator - citric acid, preserving agent - sodium benzoate, "Mint" natural flavoring agent, "Lime Tahiti type" natural flavoring agent, "Citrus component" base, cloud emulsion.

Nutrition value: carbohydrates – 10,9 g/100 g of beer.

# BENEFITS OF MINERAL WATER EXTRACTION AND PRODUCTION

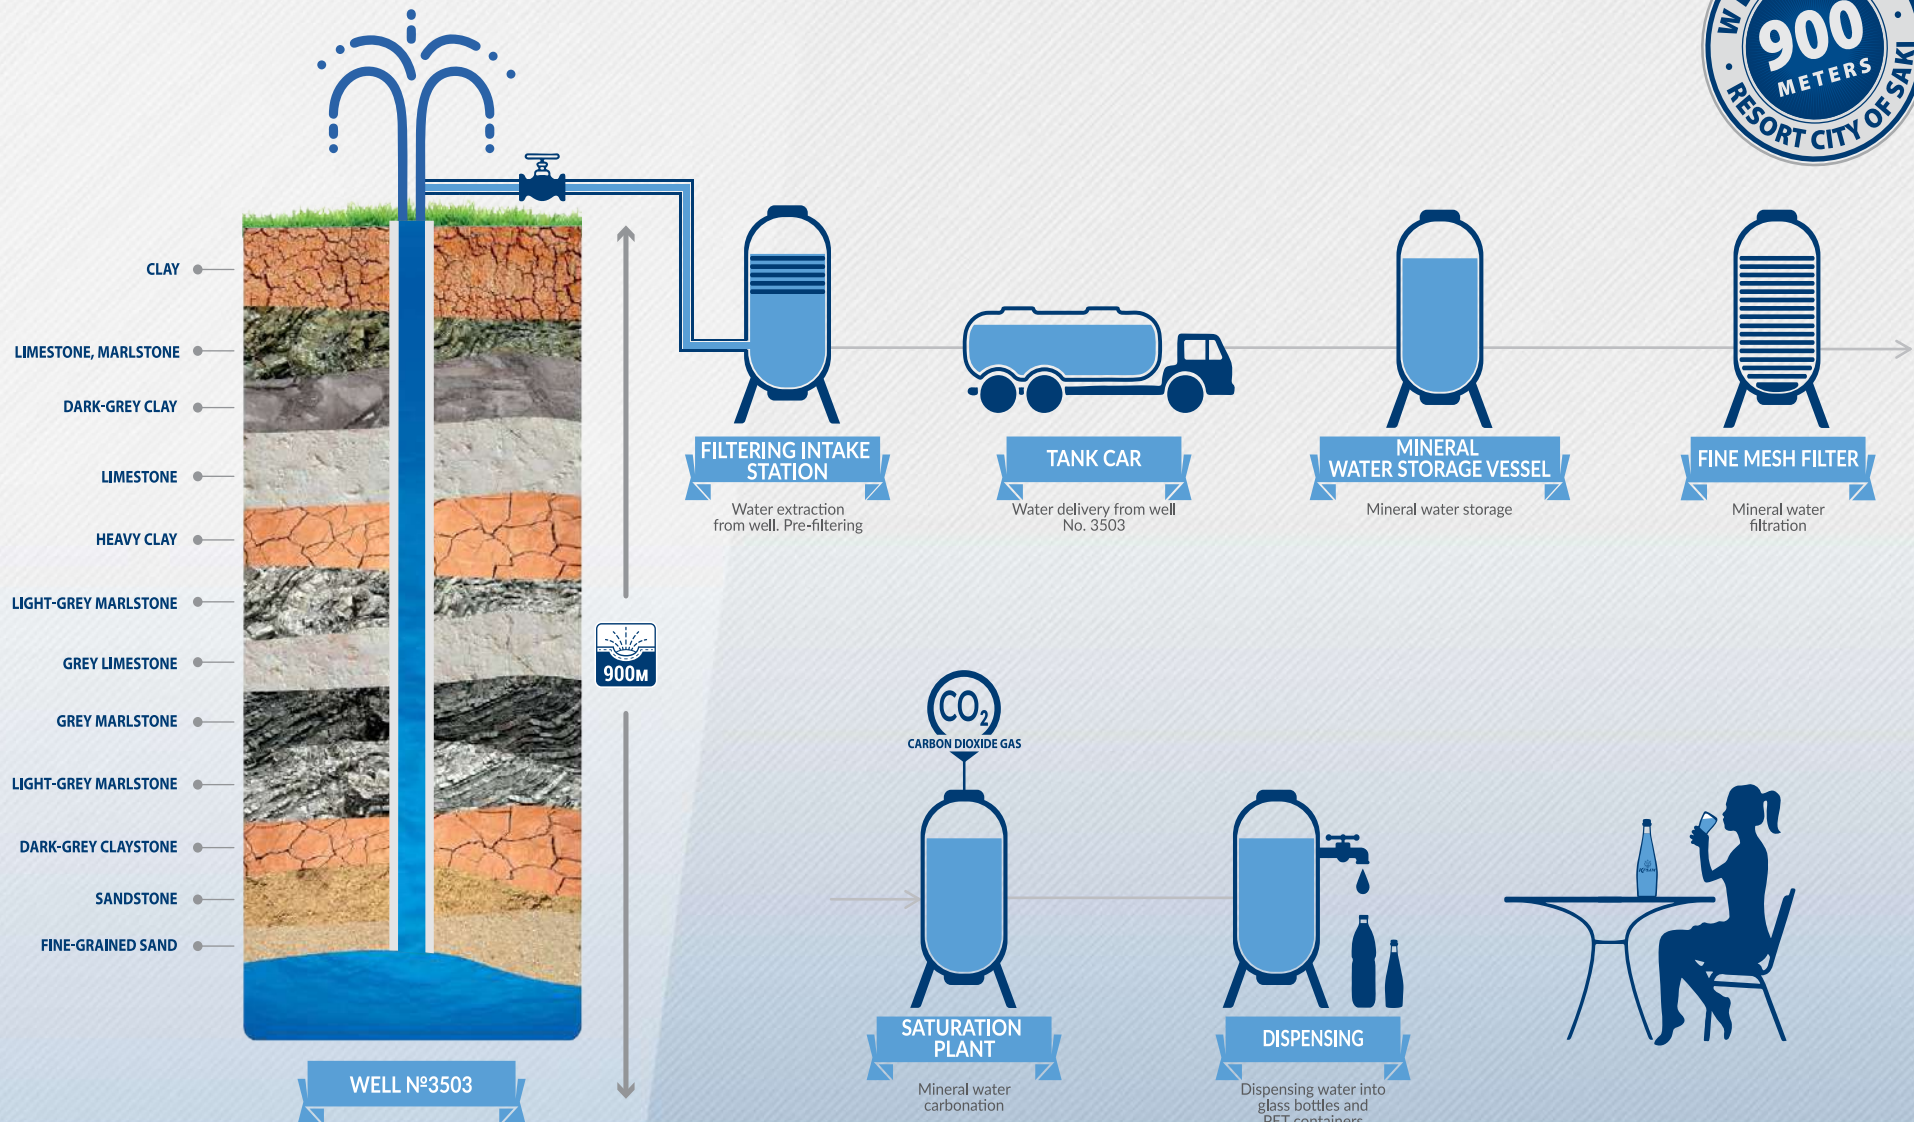

- ✓ Well No. 3503 was bored in the resort city of Saki in 1956 to the depth of more than 900 m. The composition of the mineral water has not been changing for last 60 years, which is confirmed by laboratory tests.
- ✓ Artesian water sources belong to the most important useful nature resources.
- ✓ Artesian aquifers are safely protected from non-point pollution.
- ✓ 12 layers of fine-grained and solid rocks function as a filter 900 m thick, purifying and mineralizing the water, saturating it with macro- and microelements, thus filling their deficit in human body and giving a therapeutic and health-improving effect.

*We are responsible for the quality of our mineral water!*

## KRYMSKAYA WATER WITH LIME AND MINT FLAVOR

«KRYMSKAYA WATER WITH LIME AND MINT FLAVOR» is a light refreshing drink made on the basis of the purest water and natural flavorings. The drink combines the mild taste of water and the refreshing aroma of lime, and the delicate mint aftertaste subtly complements the composition. It is a low-calorie drink that suits perfectly to quench your thirst and has an excellent refreshing effect due to carbonation.

The water, on which basis the drink is created, undergoes several stages of purification, and modern methods of filtration and softening give it a pleasant soft taste.

«KRYMSKAYA WATER WITH LIME AND MINT FLAVOR» is enriched with macro- and microelements that help maintain water balance in the body.
